

Training Hub Update

Working towards a carbon neutral future.

Introduction

TAKING STEPS TOWARDS A MORE
SUSTAINABLE FUTURE

Training Hub opened October 2022.

Education and Training in Renewable
Technologies, Retrofit and Understanding
Sustainability & Decarbonisation.

E learning courses live now.

Technical courses live from Jan 2023.

Renewable Technologies

Photovoltaic panel
installation

Heat Pump installation

Solar thermal system
installation

Electric Vehicle charger
installation

Electric Vehicle
maintenance and repair

City & Guilds

Retrofit Design & Specification

Level 2 Award in Understanding Domestic Retrofit

Level 3 Award in Domestic Retrofit Advice

Level 4 Award in Domestic Retrofit Assessment

Level 5 Diploma in Retrofit Co-ordination and Risk Management

Online Learning

Working towards a carbon neutral future.

A banner for Environmental Sustainability Specialist Energy Training. The background is a warm, orange-toned image of a bicycle. The text is overlaid in white, with 'ENVIRONMENTAL SUSTAINABILITY' in large, bold, outlined letters and 'Specialist Energy Training' in a smaller, solid font below it.

ENVIRONMENTAL SUSTAINABILITY

Specialist Energy Training

Environmental Sustainability

The first important step in supporting the race to net zero. This course has been developed as an introduction to sustainability and focuses on sustainable development goals, outcomes from COP26, impacts of greenhouse gas emissions and the solutions need to identify and manage carbon footprints.

A banner for Solar Power & PV Systems Specialist Energy Training. The background is a blue-toned image of a person in a hard hat and safety vest working on solar panels. The text is overlaid in white, with 'SOLAR POWER & PV SYSTEMS' in large, bold, outlined letters and 'Specialist Energy Training' in a smaller, solid font below it.

SOLAR POWER & PV SYSTEMS

Specialist Energy Training

Solar Power & PV Systems

A short course introducing the theory, concepts and the science behind solar and photovoltaic energy and hot water (solar thermal) systems. You will study the different types of solar cells, how they work, and how they are installed.

A banner for Heat Pump Technology Specialist Energy Training. The background is a brown-toned image of a house with a heat pump unit on the exterior wall. The text is overlaid in white, with 'HEAT PUMP TECHNOLOGY' in large, bold, outlined letters and 'Specialist Energy Training' in a smaller, solid font below it.

HEAT PUMP TECHNOLOGY

Specialist Energy Training

Heat Pump Technology

A short course introducing the theory, concepts and the science behind heat source pumps, including air-to-air, air-to-water and ground source heat pumps. Explore their workings, installation and how green funding can be accessed to accelerate their deployment.

Wind Power Technology

A short course introducing the theory, concepts and the science wind turbines and renewable wind energy. Includes learning about the how they work, how they are installed and how green funding can be accessed to accelerate their deployment.

Retro-Fitting Technologies

This course introduces the theory and practices employed in retrofitting homes. It will include a review of Energy Performance Certificates (EPC) and the practical steps that can be used to improve energy performance, with a focus on insulation, fenestration (glazing), damp proofing and draft proofing in housing.

Understanding Decarbonisation

This course has been designed to provide in-depth learning and insight into the historical causes of climate change, including the key scientific evidence of greenhouse gas emissions. You will study the impacts and the solutions that are being deployed to limit global temperature rises to 1.5 Celsius in the race to net zero.

Course Costs

Renewable Technology courses range from £320 (EV charging) to £850 (Heat pump/PV)

Retrofit courses range from £700 to £2000

Online learning ranges from £50 (one course) to £2500 (full suite, multiple users)

Funding support available depending on company and individual learner details. Talk to us!
